

2017 was a busy year for PMT. Looking ahead to the rest of 2018, here is a little bit about what we have in store:

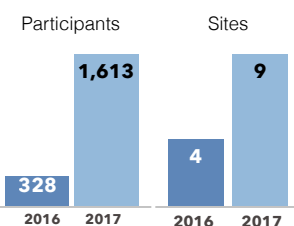

- First sample collection to begin in early 2018 in the breast cancer cohort.
- Continuing to expand the PMT network into British Columbia and Nova Scotia as well as throughout Ontario and Quebec.

Overview

- As of today: > 1800 participants
- 9 sites
- 4 provinces
- 5 health networks

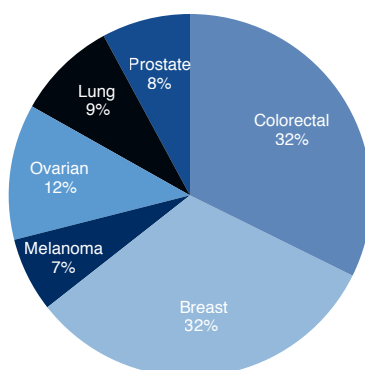

Increase in PMT recruitment and number of sites

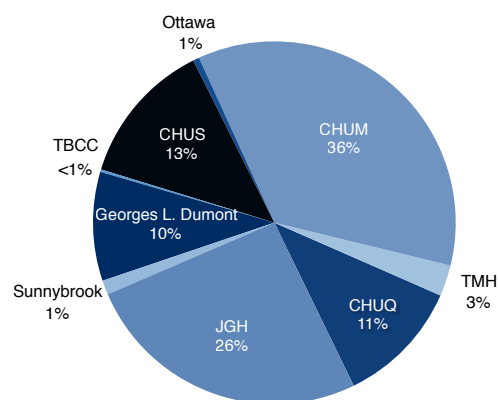

Sample Collection to begin in 2018

- 30 PMT participants with breast cancer will have circulating tumour DNA isolated from their blood and analyzed.
- First sample expected by end of February 2018.

PMT Agent Meeting
22 sep 2017

Thank you for your participation.
We look forward to the next meeting!

A planning session was held in November 2017 for the PI Coordinating Committee. The committee's aim is to provide scientific, clinical and operational assessments of clinical studies brought to or developed within the Exactis network with the ultimate objective to implement such trials at the network sites.
